CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A wet/dry bare floor cleaner comprising:
 - a base;
 - a handle pivotally connected to the base;
 - a recovery system comprising:
 - a wet suction nozzle;
 - a dry suction nozzle;
 - a recovery tank for receiving wet and dry debris;
 - a working air conduit extending from each of the dry suction nozzle and the wet suction nozzle to the recovery tank;
 - a motor/fan assembly mounted to one of the handle and the base and adapted to create a working air flow in the working air conduit from at least one of the dry suction nozzle and the wet nozzle and to the recovery tank;
 - a diverter mounted in the working air conduit and movable between a dry suction position and a wet suction position for selectively at least partially blocking working air flow from the wet suction nozzle and the dry suction nozzle, respectively, to the recovery tank;
 - and
 - an actuator mounted to the handle and connected to the diverter to move the diverter between the dry suction position and the wet suction position.
2. (Original) The wet/dry bare floor cleaner according to claim 1 wherein the actuator includes a connector between the handle and the diverter so that the diverter moves between the dry suction position and the wet suction position as the handle rotates between a dry suction position and a wet suction position.
